- => All the tests “to be verified” are verified by the monitors during the session

## ■ A comparison with other epSOS testing sessions

| session    | Number of countries |
|------------|---------------------|
| Bochum     | 5                   |
| Lisbon     | 10                  |
| Luxembourg | 6                   |
| Istanbul   | 7                   |
| Bern       | 8                   |
| Pisa       | 16                  |

| Validation tools | #         |
|------------------|-----------|
| Assertion        | 133       |
| Audit Message    | 218       |
| CDA              | 420       |
| Certificates     | 121       |
| HL7V3            | 165       |
| XD*              | 239       |
| SMP              | 85        |
| <b>eID</b>       | <b>35</b> |
| REM              | 84        |

- This table describes the number of validation performed by EVSClient using the epSOS validation tools, from the 15<sup>st</sup> of March 2016.

## New Profile : eID testing

- Number of registered member states : 2 (BMG + SPMS)
- => both of them succeeded testing for eID
- Number of validation performed using EVSClient : 35
