1 Introduction

1.1 Context

Context of the study

Study 1

Study 2

Now , detailed analysis of the activities, files and what need to be adapted to be operational with this solution

1.2 Purpose of the document

Detailed technical analysis...

1.3 Stakeholders

FH Dortmund, Autrian hospital? EC...

1.4 Scope

1.4.1 *In scope*

A. **Gap analysis FH Dortmund Terminology Server (FHDTTS):**

- Data: data model, data structure (MVC vs. FH)...E.g. mandatory columns in FHDTTS which are not present in MVC, format fields (epSOS codes are numeric, alphanumeric; FHDTTS?)
- Uses cases and requirements
 - Uses cases:
 - Input/import MVC in FHDTTS (or create subset of terms) in FHDTTS
 - Mapping of terms
 - Create MTC
 - Translate
 - Synchronize
 - Import/export MVC
 - Requirements
 - WP1: Multilingualism of user interface
 - WP2: Multilingualism of content
 - WP3: Authorization Mechanism
 - WP4: Distributed Terminology Server Infrastructure
 - WP5: Development- and Test/Evaluation-TS-Instances → See Chapter "Testing"
 - WP6: Translating MVCs
 - WP7: Education
 - WP8: Code Governance → See chapter "Release management"

B. **Interfacing FHDTTS with OpenNCP, CTS2 compliance**

1.4.2 *Out of scope*

1.4.3 *Assumptions*

1.5 Design dependencies

e.g. eHealth is not the only user/beneficiary/developer... => cf. release management, fork etc.

1.6 Pre-requisites

Upload 2 MVC from 2 different countries...

1.7 Glossary

2 Gap analysis FH Dortmund Terminology Server

2.1 Data

2.1.1 AS IS vs TO BE

2.1.2 Implementation requirements

2.2 Uses cases and requirements

2.2.1 AS IS vs TO BE

2.2.2 Implementation requirements

2.3 Other?

3 Interfacing FHDTTS with OpenNCP, CTS2 compliance

4 Security & authorization

Servers hosted in EC?
Access to the application

5 Release management

How do we integrate our developments? Fork?... Impact analysis FH current users... → See proposition of Natasha

- Fork approach
- Plug-in approach
- Other?

5.1 Governance

FH Dortmund Terminology server steerco?

5.2 Process

6 Testing

6.1 Test environments

6.1.1 WP5: Development- and Test/Evaluation-TS-Instances

For controlled software-deployment two instances of TS are necessary: One instance for development and internal tests, one instance for evaluation and testing by project team members.

5.1 Installation of Development-Instance

5.2 Installation of Test/Evaluation-Instance

5.3 Editing or Import of existing MVCs (i.e. via EXCEL- or CLAML-Import) for evaluation and testing

6.2 Testing scenarios

7 Non-functional requirements

7.1 Volume forecasts

7.2 Service Level Requirements

7.2.1 Availability

7.2.2 Performance

7.3 Monitoring
